1- COMPANY PROFILE

1- Company profile

Safety Culture Approach

1		RISK MANAGEMENT You must never commence a task without proper preparation. You must never improvise.
2		SIMULTANEOUS OPERATIONS You must consider the activities of other people when preparing for and carrying out your task.
3		STOP WORK AUTHORITY You must exercise your right to withdraw and fulfil your duty to inform others if you observe a dangerous situation.
4		EQUIPMENT & MACHINERY You must always use suitable, well-maintained and compliant equipment for which you are qualified.
5		WORKING AT HEIGHT When working at height, you must always wear your harness, except when collective protection is present and if you have received the appropriate authorisation.
6		TRAFFIC & TRAVEL You must comply with traffic rules both within and outside the site.
7		HOUSEKEEPING You must ensure that your workplace remains clean and tidy at all times.
8		POSTURES & MANUAL HANDLING You must adopt your movements and postures to the requirements of the task in hand.
9		PROTECTIVE EQUIPMENT You must use protective equipment that is suited to your work.

MANAGEMENT INTERVENTION WHEN FACED WITH EXCELLENT BEHAVIOUR

I should talk to a worker or team who has shown proof of excellent behaviour in the following manner:

- Interrupt the action being undertaken (or wait for the end of the task in order to talk to the person or team involved).
- Clearly express your satisfaction.
- Describe the situation observed, in a factual manner.
- Ask for any details required on the work being undertaken and listen carefully.
- Highlight any progress made and the impact of the behaviour (individual & collective interest).
- Pay compliments and encourage the worker/team to continue along the same lines.

MANAGEMENT INTERVENTION WHEN FACED WITH DANGEROUS BEHAVIOUR

Implement the actions required to correct a shortfall in terms of HSE regulations (Step No. 1 in the Inspection Manual). I should talk to the worker in the following manner:

- Stop the action being undertaken, making sure that my actions do not put anyone in danger.
- Start the discussion by stressing a positive aspect of the situation (what was done well).
- Describe the situation observed, in a factual manner.
- Ask questions about the risk(s) taken and the consequences to health (awareness of which may sometimes need to be re-explained).
- Ask questions about the applicable rules in place to limit the risk(s) identified, and, about the best way of safely completing the task.
- Get a commitment from the worker in terms of safety, make an appointment for a later update on the application of the rules in question.

Control guide applicable to the HSE field

Objectives

HSE rules (especially the Golden Rules) are essential. These rules are applicable to all employees without exception.

A breach of these rules requires a 2-step approach:

- Implementation of the actions necessary to correct the situation.

Assessment of the causes

Appropriate response to an employee failing to comply with an HSE rule: **diagnosis**

```

graph TD
    Q1[Knowing: Did the person know the rule?] -- YES --> Q2[Being able: Was the person in a position to apply the rule?]
    Q1 -- NO --> A1[Explanation sought or training on the rule and the applicable rules]
    Q2 -- YES --> Q3[Wanting: Did the person deliberately break the rule?]
    Q2 -- NO --> A2[Analysis of causes and compliance]
    Q3 -- YES --> Q4[Context: Would another person in the same situation have behaved in the same way?]
    Q3 -- NO --> A3[Interview with supervisors]
    Q4 -- YES --> A4[Negligence]
    Q4 -- NO --> A5[Disciplinary action]
                    
```

Appropriate provisions

Risk level	Major risk	Moderate risk	Minor risk
Interview to be conducted at the following level	Branch management and / or General Management	Branch management	Supervisors
Example of disciplinary action	Layoff for 3 days	Written warning	"Call to order" (recorded)
Example of disciplinary action (Recurrence, misrepresentation)	Dismissal	Layoff for 3 days	Written warning

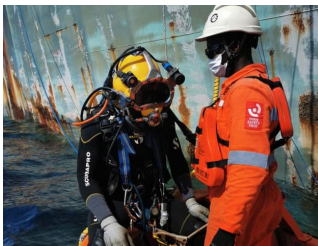

1- Company profile

Equatorial Guinea Industry Diving & Rope Access

➤ Our Mission:

EGIDRA SL provides a range of essential services to the offshore oil and gas industry. With experience supporting clients operating on critical assets in often remote and challenging environments, we work with international oil companies, national oil companies, independent producers, and oilfield service providers in Equatorial Guinea.

Our multi-skilled teams carry out a variety of value-added tasks both offshore and onshore, aiming to deliver services that are practical and tailored to our clients' needs. We place a strong emphasis on safety and environmental protection in all our operations

1- Company profile

Equatorial Guinea Industry Diving & Rope Access

➤ Our Solutions:

Our experience in Equatorial Guinea and in this market has enabled us to adapt our activities to meet the exacting needs of our customers in this industry, such as:

- Reducing POB by mobilizing multi-skilled technicians and supervisors,
- Sourcing, training, mobilizing and managing large teams to execute specific projects during high-activity periods,
- Modification of work processes to ensure we maximize job engineering, planning, preparation and supervision performed by our on-shore teams, again reducing cost and POB,
- Reducing equipment and weight on-board by mobilizing our rope access specialists in preference to traditional scaffolding-based access solutions,
- Providing various type of inspections and solution plan

1- Company profile

National Content requirements:

- Decree 127/2004:

Decree 127/2004 requires that companies with shareholder capital operating in the petroleum sector include Equatoguinean shareholders. Foreign-owned companies or those established by non-nationals must have at least 35% of their share capital held by Equatoguinean partners. Additionally, Equatoguinean partners must represent at least one-third of the Board of Directors. In certain sectors, investments must be structured as public-private partnerships with a government entity.

- Sociales donations:

In accordance with local regulations, all foreign companies are required to make a social contribution to renew their MMH authorization to operate in the oil & gas sector. The contribution is defined by national content requirements, and companies are obliged to provide the necessary support.

- Subsurface and sediment profiling

Welding Support

- Deck & Structure Preparation
- Seafastening Mobilization,

2- Industrial Services

➤ Projects References

Since **EGIDRA S.L** is a new entity fully registered in the Oil & Gas sector of Equatorial Guinea , we have no tracks record under EGIDRA company name.

However our past experience in EG with other company are:

AMPCO: (2023–2024–2025)

- Underwater intervention on export hose maintenance
- PLEM inspection
- Repair of seawater suction system in Punta Europa

TRIDENT ENERGY (2025)

- Export hose replacement

GEOMS C/O Marathon Oil (2023–2024–2025)

- Replacement of tanker mooring buoys
- PLEM inspections
- Various Subsea maintenance

GEOMS C/O EGLNG

- Bathymetric survey of punta europa

GEPSING LTD (2023)

- Insulation support project – ASENG FPSO
- Intervention on Export Hose maintenance

Chevron (2025)

- Diving spot intervention on export hose

TotalEnergies (2022–2023–2024)

- Logistics management & diving supervision
- Change of mooring buoys and maintenance of underwater fuel loading line

TRIDENT ENERGY (Project management with Rana Diving)

- Project management: UWILD renewal – SENDJE CEIBA FPSO (2022/2024)

TRIDENT ENERGY (Project management with Rana Diving)

- Logistics management: subsea export hose – Bata / Malabo (2022)

Marathon Oil (Project management with Rana Diving)

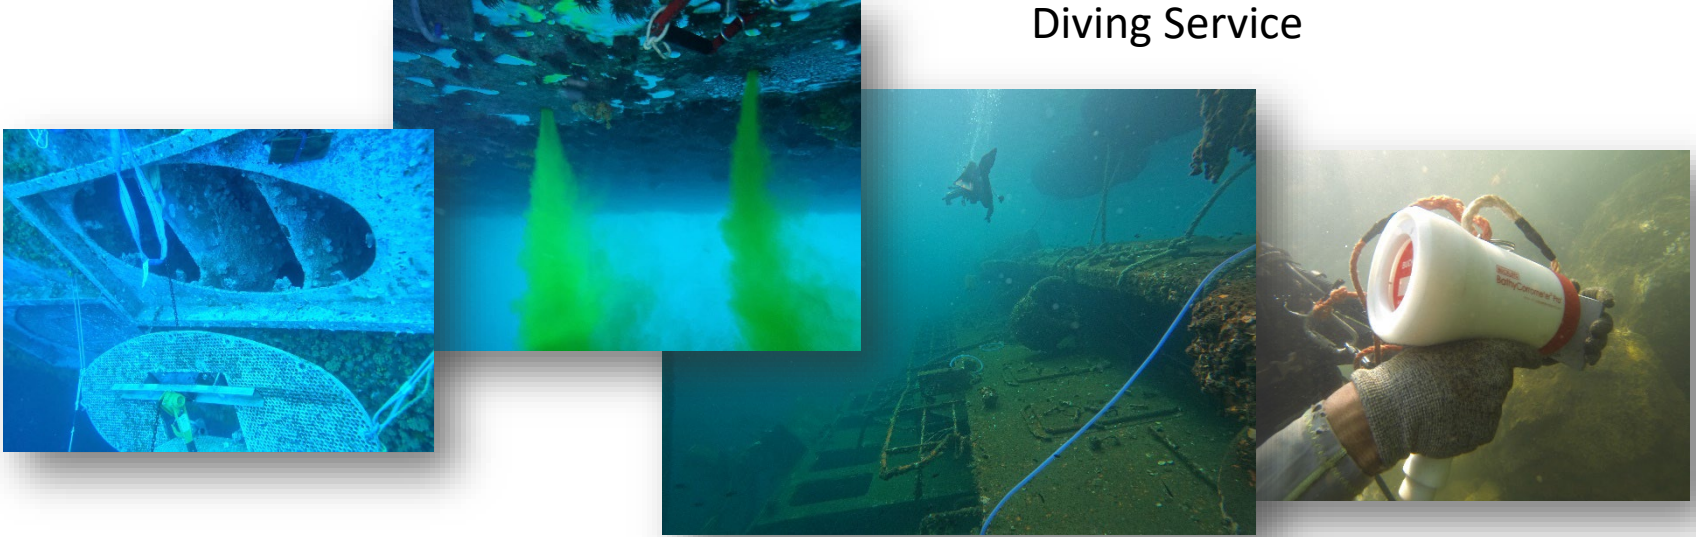

- Logistics management: subsea maintenance – Malabo (2022)

Saipem / Chevron (logistique mangement with Friedlander) (2020–2021)

- Logistics management: subsea and welding construction for gas pipeline laying – ALEN
